## About

---

I'm a Front-End Developer who changed careers from the construction industry into IT. For over eight years, I've worked as an architect with design and project management. Due to my passion for technology and problem-solving, I've moved into tech. I'm an analytical thinker, passionate about learning new things and always concerned about the User Experience.

## Skills

---

Technologies: HTML, CSS, JavaScript, ES6, React JS, Bootstrap, jQuery, GitHub, Rest API interaction  
Languages: English, Portuguese, Spanish

## Projects

---

### **URL Shortener App** | HTML, CSS, Bootstrap, JavaScript, Rest API

Front-end web developer

- Challenge proposed by frontendmento.io
- Designed in JavaScript, access and use API from an external server
- Allows users to short web URLs
- Responsive in all devices

### **NASA Gallery** | HTML, CSS, Bootstrap, JavaScript, Rest API

Front-end developer

- Web App developed in JavaScript that consumes data from NASA's database through API and display a gallery of images and information according to user research.
- Responsive to all devices.

### **To-do List App** | HTML, CSS, JavaScript, React

Front-end developer

- Web app that allows users to create, read, update and delete tasks they want to work on.
- Designed in React using state management with Hooks.
- Data stored in LocalStorage and accessed by user's server when page is reloaded.

### **Weather App** | HTML, CSS, Bootstrap, JavaScript, React, API

Front-end developer

- Built a dynamic Web App in React.js using API from an external server.
- Users can search for cities weather info around the globe

### **Google Search Clone** | HTML, CSS

Front-end developer

- A clone of Google Search, Google Images and Google Advanced Search Website
- Made in CS50's Harvard online course.
- Allows users to type in a query and be taken to the Google search result for this page.
- CSS match Google's own aesthetics.
